PHYSICAL ACCOMPLISHMENTS UNDER A.I.D. PROGRAMS

Selected Data - FY 1962 to FY 1970

NOT FOR GENERAL DISTRIBUTION

The material in this tabulation has been carefully compiled from the best available data for selective use in speeches, testimony, reports, etc. Because the information is subject to the qualifications set forth in the Foreword concerning completeness of coverage, comparability among countries and other difficulties of interpretation, the material is not designed for distribution generally outside the agency in its entirety. Please read the Foreword carefully before using the material. The Information Staff may be consulted on questions concerning public distribution of particular data.

FOREWORD

This is a report on physical accomplishments under A.I.D. programs. It covers only the accomplishments in those countries where a Mission was in operation in FY 1970, and only those indicators which are applicable to a large number of countries. There are, of course, many more accomplishments which are either not quantifiable or which are applicable to only a few countries.

"A.I.D. programs" include programs financed with A.I.D. dollars, local currency programs requiring A.I.D. approval, and Social Progress Trust Fund programs.

Since A.I.D. programs are usually integrated with host country efforts, the determination of what can be attributed to A.I.D. is to some degree a matter of judgment. AID/Washington gave the Missions general guidelines indicating that credit should be taken only when A.I.D. had substantially assisted a program, and when the accomplishments bore a reasonable relationship to the aid provided. The final decision, however, was left to the technical staff in the Mission, and undoubtedly some countries took a more restrictive approach than others. Also, Mission records are retired every few years so that coverage is generally more complete in newer Missions than in those which have been in operation for many years. This is particularly true for items calling for benefits currently being derived from programs ever assisted, where the information was frequently not available (marked n.a. on the tables). The figures for regional and worldwide totals are the sum of available information only; the "n.a.'s" (data not available) were treated as zero.

Where the number of physical facilities provided or assisted is shown, this refers to the number completed during the period; but where the benefits derived from these facilities are shown, the numbers refer to the total of people benefitting during the period from facilities ever provided or assisted, except for item 12 which refers to the people benefitted from dwelling units provided during the year.

In view of the above, and of the fact that the unit of measurement may not be completely comparable among countries, many of the worldwide and regional totals may be somewhat understated, and precise comparisons among countries are not possible.
